We have yet to hear of a rider of the COLUMBIA BEVEL-GEAR CHAINLESS who would willingly give it up for any other wheel.

Direct testimony is always better than hearsay evidence. If you desire to know about Sevel-Gear Chainless bicycles, do not ask a person who has never ridden one, or is in any way connected with a manufacturer who does not make them. Inquire of riders of the Columbia Sevel-Gear Chainless. There are thousands of them throughout the country. They are to be met in every city, in almost every town of the United States—so popular has the machine become in the short space of a year and a haif. There are reasons for this. The Chainless is easier to take care of than the chain wheel. It has a longer life. Every onnce of power applied to the pedals is made effective. This last advantage over chain-drivan wheels is apparent the moment you mount the machine. The Chainless seems to possess an activity and life of its own. You notice it in starting, stopping, backpeddling, riding on levels, and especially in ascending grades.
